7. Listen as your instructor tells the life history of one representative of each: lizard, snake, & turtle. Compare lizards, snakes, turtles, & crocodiles.

Reptile	Eye lids	Ears	Teeth	Heart	Lungs	Limbs	Tails	Scales
<b>Lizards</b>	movable eyelids	external	sharp, tricuspid	3 chambers	2 full lungs	4 legs	Can break off	do not grow, but
<b>Snakes</b>	transparent eyelids, permanently closed	internal	grooved or hollow	3 chambers	left lung smaller or absent	none	does not detach	do not grow, but sheds
<b>Turtles</b>	have eyelids	external	no teeth, have	3 chambers	2 full lungs	4 legs	tucks into shell	grow some form shell
<b>Crocodiles</b>	one transparent, one opaque	have "earlids"	sharp, designed to tear	4 chambers	2 full lungs	4 legs	powerful	grow

Leopard Gecko

Garter snake

Leatherback Turtle

4. Tell what to do if you are bitten by a venomous snake.

---

---

---

---

---

---

---

---

---

---

5. Tell what to do if you are bitten by a non-venomous snake.

---

---

---

6. Locate two Bible stories in which a reptile(s) played an important part. What is the Bible Reference and Title of the Stories?

---

---

---

---

1. What characteristics must an animal have to be classed as a reptile?

---

---

---

2. Fill in the five venomous reptiles of the United States of America and note the location of their fangs and geographical distribution.

Reptile	Distribution	Location of Fangs
	Massachusetts south to Florida west to Texas north to Iowa	Upper jaw, front of mouth
	Southern and eastern United States	Upper jaw, front of mouth
	Eastern US from Virginia, south through the Florida peninsula and west to Arkansas, southeastern Kansas, eastern and southern Oklahoma, and eastern and central Texas.	Upper jaw, front of mouth
	Southwest US, Northern Mexico	Lower jaw
	Several species, some ranging from southern Canada, others to South America	Upper jaw

3. Discover 20 different reptiles at the Zoo. Place a check in the box for any that can be found in your State or Conference.
